

INFANT CPAP NASAL CANNULA SEAL

ABSTRACT

5 A nasal CPAP cannula seal that includes a
strip of flexible material, between about 3 to 10 cm
in width and between about 5 to 15 cm in length. The
strip defines a pair of substantially round nostril
apertures, each aperture having a diameter of between
2 mm and 4.5 mm and being spaced apart by from 1.5 mm
to 3 mm. Also, the strip further defines a set of cuts
10 extending outwardly from each nostril aperture.
